## EXECUTIVE SUMMARY:

Driven professional with broad technical skill set, very strong attention to detail, and over 4.6 years of experience in front-end web development. Able to multitask and work with multiple pressing projects simultaneously. Having good experience in building robust and reusability code. Also possesses the ability to improvise, troubleshoot, take ownership, and learn new skills on the job. Solid Understanding of Computer Language's and Software Development.

As a part of job, has created real time web applications, and complex front-end. Having experience in working across Windows & Linux Based Development Environments.

Also having developing experience with HTML5, CSS3, React JS, Angular 7,8, Bootstrap, jQuery, JavaScript, TypeScript, Redux, Material UI, Builder.ai and various other unified technologies. Firm grasp of the java script and its nuances, including ES6 and ES7 syntax. Experience in working with building blocks.

## EXPERTISE:

### January 2019 – Aug 2021, Software Engineer (Ojas Innovative technologies pvtltd, Raidurgam X Road)

During this service tenure had associated with numerous projects with various clients, where in had to takeover:

- Developed Websites from the scratch in frontend by using React js and Angular 8.
- Assisted other teams in jquery.
- Built Single page web application for a client.
- Achieved in developing complex applications and beautiful user interfaces.
- Focused on user-friendly design principles.
- Mentor junior engineers and aid them to further develop their skills.
- Involved in exchange of Technology with other domains.

**Technologies:** HTML5, CSS3, TypeScript, Bootstrap, Material UI, JavaScript, jQuery, Angular 7,8, React js, Redux.

**Aug 2021-Present, Software Engineer (Copart (CITC), Mind space, Hyderabad)**

During this service tenure had associated with specific projects that are associated with business, wherein had to takeover:

• Involved in developing project from the scratch in frontend by using React js and Redux Saga.

• Assisted in production support for four websites.

• Had the ownership of managing the builds by deploying into respective stages (qa, stage) and creating CR's.

• Used to manage the Git by planning releases.

• Understanding the business requirement by having discussion with team members as it mentioned in Jira achieving it accordingly.

• In this firm having developing experience with HTML5, CSS3, SCSS, JavaScript, React js, Redux, Solr.js, Ruby.

**Technologies:** HTML5, CSS3, SCSS, JavaScript, React js, Solr, SQL DB, Ruby (Sinatra).

**AREAS OF EXPERTISE:**

• Experience in development of multi-tier web based and Distributed Applications in HTML and Scripting language.

• Strong experience in developing the web and responsive applications using frameworks like Bootstrap, Angular, React js.

• Experience in using Hooks, Forms, Routing, React Bootstrap and Hooks, Redux Thunk, Redux saga.

• Experienced in all project phases using Agile Methodologies.

• Good in making robust, readability and reusability code.

• Experience in google optimization procedure.

• Well aware of the project flow from QA to PROD.

• Flexible in using Git, Jenkins and spinnaker.

• Hands on using these libraries Reactstarp, antd, Material UI,

• Experience in working with IDE editor tools like Notepad++, Dev C++, Visual studio.

• Dedicated to successful project completion with the ability to work well in a large group or as an individual under deadline pressure.

• Excellent analytical and Wide Exposure in problem solving and debugging skills.

• Influential character with good Technical & pioneering skills and can handle Software Projects

efficiently.

- Ability to learn new technologies with minimal time period.
- Firm grasp of the java script and its nuances, including ES6 and ES7 syntax.
- Rock solid at working with third party dependencies.
- Strong verbal and written communication skills.
- Experience in working with backend technologies like Ruby and Node js.
- Experience in confluence and general documentation best practices.

## EDUCATION:

- B. Tech-2019 (CSE) with an aggregate of 7.1(CGPA) from Madanapalle Institute Of Technology and Science, Madanapalle.

## TECHNICAL SKILLS:

| | |
|---|---|
| Operating systems | : Linux and Windows 8,10. |
| Packages | : MS OFFICE 2003, 2007, 2010. |
| Web Technologies | : HTML5, CSS3 and SCSS. |
| Scripting Languages | : JavaScript, ES5&ES6 and Typescript. |
| Frameworks | : Angular, React JS. |
| Libraries | : Ramda js, lodash, Material UI, Bootstrap and Ruby. |
| DB | : SQL DB, Mango DB |
| IDE Software | : Eclipse, Notepad++, Sublime Text and Visual Studio Code. |
| Deployment Platforms | :  Jenkins, Spinnaker, AWS S3 and Netlify. |
| Other Skills | : Ruby, Node js and Solr. |

## SPECIFIC PROJECT EXPERIENCE:

| | | |
|---|---|---|
| **Product** | **:** | **PPH & FSW (UK Clearance and Authorization)** |
| Environment | : | HTML5, CSS, SCSS, Copart Libraries, Redux and React js. |
| Role | : | Software Engineer |

**Description:**

PPH & FSW (UK Clearance and Authorization) application plays major role in Copart- UK. The main goal of this project is to process the hurdles of tasks and move it to auction. It has the two roles UK Clearance Advisor - do's the process of clearance & authorization and UK Vehicle Management Advisor – has the

permission to reopening tasks, processing bulk of lots and some extra features. The process starts from dispatching the vehicle from the accident spot to yard then will determine the PAV, Category and process the holds(Private Plate Hold), Finance service and service orders tasks we follow stage name for every processed task then the stage would move accordingly one to other, finally will do the authorization by assigning auction date and it moves to auction.

**Responsibilities:**

- Involved in Business Requirement analysis.
- Achieving the jira tickets with regards to Production bugs and enhancements.
- Developed the list views with wide range of features from front end and backend.
- Worked with other teams in order to maintain data in solr.
- Accomplished by processing the lots in bulk fashion.
- Coordinating with team members.
- 

| | | |
|---|---|---|
| **Product** | : | **UKCS (UK Claims)** |
| Environment | : | HTML5, CSS, SCSS, Copart Libraries, Redux and React js. |
| Role | : | Software Engineer |

**Description:**

UKCS (UK Claims) application plays major role in Copart- UK. The main goal of this project is to get the Insurance claim to the vehicle owner. It has the two roles UK Claims Advisor- process the  tasks of claims and UK Claims Manager – has the permission to reopening of claim. The process starts from dispatching the vehicle from the accident spot to yard then will have a series of tasks ( PH Intro Call, Finance Information, Offer Negotiation e.t.c) that  would be evaluating the vehicle and consistent follow-up with owner, in the offer negotiation the amount will be negotiated with owner that final agreed amount claimed by owner. If Owner retains the vehicle based on seller the percentage will deducted from the amount and settled.

**Responsibilities:**

- Involved in Business Requirement analysis.
- Developed the offer negotiation process.
- Achieving the Jira tickets with regards to Production bugs and enhancements.
- Managing the git and deployments.
- Coordinating with team members.

| Product | : | **Recruitex** |
|---------|---|----------------|
| Environment | : | HTML5, CSS, Bootstrap, jQuery, java script, React Js and Java |
| Role | : | Software Engineer |

**Description:**

Recruitex is a web application in which we have four modules BDM, BDM Lead, Recruiter and Admin. This application is to track the client requirements and candidate status in the recruitment process. Here BDM will add the requirement and assign it to recruiters. Where recruiters can add candidates, who are matching that requirement. Then BDM Lead will shortlist that profile and forward it to client. If client is satisfied with that profile, then recruiter will process that candidate for the interview. Finally, if candidate is selected in all the interview rounds then his offer letter will be released.

**Responsibilities:**

- Involved in Project Flow analysis.
- Worked for the user requirements and prepared the software functional activities.
- Used to identify bugs and fix them.
- Created Components and Modules implemented routing and Reactive Form Validations.
- Integrated backend APIs and Data Binding.
- Attended daily scrum meetings.
- Worked on Recruiter module to add and post the status about the candidates.
- Worked on Candidate login which will have Job applications, Interview Tracker.

| Project | : | **SteelBest** |
|---------|---|----------------|
| **Environment** | : | HTML5, CSS, Bootstrap, jQuery, JavaScript, React Js and Node JS |

**Description:**

The SteelBest is an application that deals with industrial data it includes subbranches Country, City, Lane, Zone, Group etc. It CC cameras collect data if a worker not wearing a helmet or is doing any malicious activity it sends the data Front End displays those images. It gives training to those workers. It also records industry environments and if it crosses it sends alerts and alarms to managers. Responsibilities.

**Responsibilities:**

- Developed Tables, Filter and Styling.
- Done all API Integration with React Js Libraries.
- Done on Merging Two React Projects.
- Worked on images Applying canvas to them which is main integration to the Project.
- Endpoint Integration.
- Created Components routing and React Formik Form Validations.
- Used to identify bugs and fix them.

**Project** : **Ytrend**

**Environment** : HTML5, CSS, Bootstrap, Reactstrap, React Js and Redux.

**Description:**

Ytrend is the e commerce application regarding to Burqa, It has three modules Login Module, Products -Module and Profile Module, which it has features of booking the products, based up of guest user and login rendering the data which it provides authorization barrier. It has Filter sort of Products with wide range of categories. User can Wish List the products. User can add Multiple addresses to the shipping.

**Project** : **Vooyah**

**Environment** : HTML5, CSS, Bootstrap and Angular 9.

**Description:**

Vooyah is a travelling application, application involves Two modules admin and User modules, user can book his tour from origin to destination, can be allowed to add multiple destinations along with he can book activities (visit in that city) and hotels it will be under Timeline Itinerary. Multiple destinations can be shown in the maps. At the booking stage he can view all booked data further lead to payment.

**Project** : **RealWave**

**Environment** : HTML5, CSS, reactstrap , antd React js , Redux and Node js.

**Description:**

Realwave is a video surveillance application which is categorised by regions, sites along with client and admin modules. It is developed with multi-flexibility features for users. It has the feature of viewing the video of cc camera from anywhere. In the one module is role which has to give permissions to client and Admin.

**Project** : **Streo**

**Environment** : HTML5, SCSS, reactstrap , React js and Redux.

**Description:**

Streo is Music All Features is a music application where we have roles Artist and fan; we will navigate users to different dashboards based on roles, artist will make live on other end fan will listen to the live. Inviting users is one more feature.

**ACADEMIC PROFILE:**

| Board/ University | Institution | Degree |
|---|---|---|
| JNTUA | Madanapalle Institute of Technology and Science | B.Tech(CSE) |
| State Board | Sri Chaitanya junior college | Inter +2 |
| State Board | Keshava Reddy Concept School | 10th |

**PERSONAL DETAILS:**

Date of Birth          :  15 - July -1998

Gender                   : Male

Marital status         : Single

Languages Known    : English, Telugu, Hindi.
